

## Topic: Marvellous Magic

Complete 5 of the homework options.  
This project is to be handed in : Monday 21th October 2024

Using your knowledge of different materials and reversible/irreversible changes, create your own magical medicine. Write a set of instructions; these should include the name of your medicine, what it does, the ingredients and the method (how to make it). An adult will need to supervise you handling the ingredients and remember to take pictures!

Can you create your own booklet of magical spells? Make sure you include what the spells are for, you may want to make them rhyme and you can add some colourful illustrations and decorations.

Learn to perform a magic trick. You can use anything - from a deck of cards to disappearing coins, from mixing up cups to hats and rabbits! You can perform it to the class or to a friend or an adult, or even film yourself!

What tools do enchanted beings need to perform magic? Wands, potions, cloaks, cauldrons, hats, staffs, amulets? Design an object you could use... then create it. You could use junk materials, polymer clay, fabric etc.

Research an artist of your choice and recreate one of Eva Ibbotson's mystical characters in the style of your artist using any media you wish.

Can you continue the tale of Elf Road? Write a story or diary entry about Billy's further adventures. Don't forget to include lots of description.

Create some maths questions about our magic topic for someone in your family or friends to solve.

We are reading about many different types of magical beings (wizards, elves, ogres, mistmakers, feys, hags etc). Find out or make up facts about them and create your own set of Top Trumps/ Pokémon style cards.

Free Choice box.
